PROJECT: Utility Cut (UER) Asphalt Repair IDIQ:

CIP ID: n/a

IFB# 6100 CLMC783

SUBJECT: Answers to Bidders Questions 1 as of the date of this letter, per 00100-IFB Article 1.(3)(C).

The following are answers to Bidders received on the above project. These answers do not modify the Contract. Any modifications to the Contract will be through Addenda

Q-1: Do you have an estimated size for each Work Assignment? For example if we repair the asphalt on one water service then we may be looking at repairing 100 SY of asphalt.

A-1: No, they vary in size. Majority of cut repairs are in the 10 SY to 25 SY range. Some cut repairs are 100 SY.

Q-2: What kind of Utilities are we repairing the asphalt for?

A-2: These are mostly Austin Water cuts with a few from Watershed Protection. Therefore, the predominant cuts are for water lines, water services, hydrants, and valves; with wastewater lines and appurtenances being second; and finally drainage items being the third most frequently fixed.

Q-3: Bid Item SP203-D (Rework & Lime Treatment for Wet Trench Backfill). Can CLSM be an acceptable substitute for this item?

A-3: No substitution for rework and lime treatment shall be acceptable.

Robert Hermosillo
